## AI Video Presentations

Welcome to an exciting new way to create video content.

A new way to promote your business, your services, even yourself.

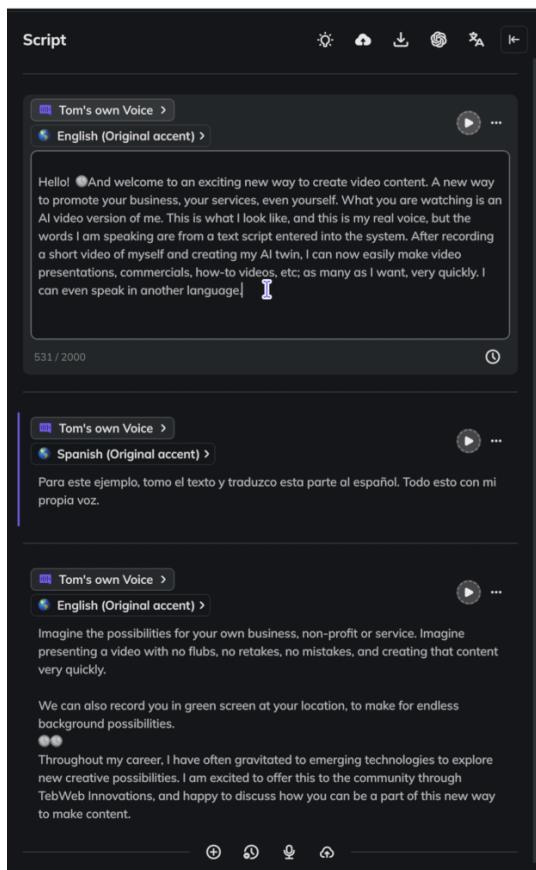

After recording a short video of you and creating an AI twin, you can now easily make video presentations, commercials, educational videos, etc; as many as needed, fast and efficient.

### HOW IT WORKS:

We come to you, and record a few minutes ad libbing to the camera. We can film you in a number of outfits for different looks, and even bring a portable green screen to create digital backgrounds.

RECORDING A 2-5 MINUTE VIDEO TO TRAIN THE AI SYSTEM.

### INPUT A TEXT SCRIPT:

We then take a completed text script and enter into the system. You (*or rather your AI twin*), will speak the text in *your* mannerisms and voice!

You can even speak in other languages and dialects.
